Abstract not available for CN1340189

Abstract of corresponding document: **WO0129832**

A record carrier of a read-only type has information in a track. The information is subdivided in addressable blocks and a number of blocks constitute an information unit. The information unit is the minimal unit for error correction according to a format for writable record carriers. On the read-only record carrier a linking area is provided between information units. This has the advantage that compatibility with recordable record carriers is improved.

[57] 摘要

一种只读型的记录载体,具有在轨迹中的信息。将该信息细分为可寻址字块和构成信息单元的若干字块。该信息单元是根据可写记录载体的格式纠错的最小单元。在该只读记录载体上在信息单元之间设有链接区。这具有的优点是,改善了与可记录记录载体的兼容性。
